

CE 329 Fall 2015
Assignment 19 Self-Assessment Survey

All but the final question are true/false

1. I had difficulty assigning the quantities given in the problem statement to the corresponding variables.
2. I used the given rate coefficient as the pre-exponential factor.
3. I had difficulty determining what type of reactor was used.
4. I had difficulty writing the mole balance design equations.
5. I had difficulty writing the energy balance design equation.
6. I had difficulty substituting the rate expression into the design equations.
7. I had difficulty determining whether or not I could choose a basis.
8. I had difficulty determining the type of equations I needed to solve.
9. I had difficulty determining the independent and dependent variables.
10. I had difficulty determining which equations to solve numerically.
11. I had difficulty determining what I needed to provide in order to solve the equations numerically.
12. I had difficulty determining the initial conditions.
13. I had difficulty determining the final condition.
14. I had difficulty determining how to evaluate the derivatives, given values for the independent and dependent variables.
15. I had difficulty solving the equations numerically.
16. I had difficulty using the results from solving the equations to answer the question.
17. I made one or more minor math or programming errors.
18. I had no difficulty solving this problem.
19. I had other difficulties as follows:
