

**CE 329 Fall 2015**  
**Assignment 6 Self-Assessment Survey**

All but the final question are true/false

1. I had difficulty identifying the reactive intermediates in the mechanism.
2. I had difficulty determining whether the mechanism was a chain mechanism.
3. I had difficulty classifying the steps in the mechanism.
4. I had difficulty determining which equation to use to write the rate expression from the mechanism.
5. I had difficulty expanding the summations and continuous products in the equation.
6. I made a simple mistake when expanding the summation and continuous products in the equation.
7. I had no difficulty with this problem.
8. I had other difficulties as follows:
